

# Prerequisite Course Options

The MAcc program welcomes students from many different backgrounds. Students without an accounting undergraduate degree must complete prerequisite courses. Accounting prerequisites must be completed prior to beginning graduate accounting coursework, while business prerequisites must be completed prior to MAcc graduation. The required courses may be completed through a variety of programs.

A maximum of six (6) hours of graduate business prerequisites may be used as electives towards required MAcc hours. Introduction to Auditing (BBA 640 or ACCT 543) may also be used as an elective towards required MAcc hours. Undergraduate business classes and those taken at other institutions, while satisfying the prerequisite requirements, will not count towards required MAcc hours.
