ELECTIVES • An elective is any course offered by the MAcc program that is not a required course for your track. See the course grid and the course descriptions document for available electives.

500-LEVEL COURSEWORK • A 500-level course may be taken by either an undergraduate student or a graduate student. Taking a required course as an undergraduate student opens additional elective options in your MAcc coursework. It does not reduce the 30 graduate credit hours required to graduate from the program.
